

APPROVED HANDOVER

HOME AI UNDERSTANDING AND REV CREATION THEATRE

Locked founder direction for the Home conversation, visible knowledge growth, the approximately two-minute 3D creation experience, and Workshop arrival.

CORE DECISION

The Workshop opens only after Concept 01 exists as stored, validated 3D.

The screenshot displays the reAldea REV website interface, which is designed to guide users through the process of creating a 3D model from a concept. The interface is set against a dark, atmospheric background with a man in a suit holding a folder, and a bright blue energy stream flowing from his hand towards the central content area.

FROM IDEA TO EVIDENCE

HOW IT WORKS WHAT REV DOES **RETURNING PROJECT**

YOUR AI ENGINEERING WORKSHOP

YOUR IDEA.
ONE CONVERSATION.
A WORKSHOP AWAITING YOUR INVENTION.

Describe your idea in plain language. REV will understand it, create the first visual concept and start the specialist work around it.

NO TECHNICAL LANGUAGE **PRIVATE TO YOUR PROJECT** **YOU MAKE THE DECISIONS**

WHAT REV UNDERSTANDS

- ✓ LOW-PROFILE EYEWEAR
- ✓ WORN LIKE SUNGLASSES
- ✓ REAR RETENTION STRAP
- ⚠ **SEAL POSITION — NEEDS YOUR ANSWER**

REV UNDERSTANDING

IDEA CAPTURED FORM UNDERSTOOD KEY PARTS READY TO CREATE 3D

YOUR IDEA
Surf sunglasses worn like eyewear, with a rubber seal and rear strap for underwater retention. [VIEW WHAT I TOLD REV](#)

REV • ONE USEFUL QUESTION
Should the rubber seal surround only your eyes, or also cover your nose?

[EYES ONLY](#) [EYES AND NOSE](#) [I'M NOT SURE — LET REV RECOMMEND](#)

OR TELL REV IN YOUR OWN WORDS
Type your answer here... [ADD THIS TO REV'S UNDERSTANDING](#)

1. HOME BECOMES AN AI EXPERIENCE

The existing Home layout stays intact; the main console changes state after ASK REV.

- The inventor begins with whatever they know - one rough sentence, a full description, a sketch, a photo, or no drawing.
- ASK REV activates the live understanding loop. There is no separate chatbot window, sidebar, or tab.
- REV asks one useful question at a time and offers I'M NOT SURE - LET REV RECOMMEND.
- Canonical promise: REV will understand it, create your first 3D concept and prepare your Workshop.

2. EVERY ANSWER VISIBLY INCREASES REV'S KNOWLEDGE

The electrical pulse is tied to genuine information gained, not decorative progress.

- Blue electricity breathes from REV's hand during active communication.
- After a useful answer, an orange knowledge pulse travels into the next understanding segment.
- The new fact appears under WHAT REV UNDERSTANDS as the meter settles from blue toward orange.
- The meter measures information coverage. It is not a confidence percentage, feasibility score, or false claim of certainty.

3. THE APPROXIMATELY TWO-MINUTE CREATION THEATRE

The user remains on Home while REV creates, validates, stores, and prepares Concept 01.

1 UNDERSTANDING LOCKS

The completed knowledge stages glow. REV states that enough is understood to create a faithful first 3D concept.

2 ENERGY INTENSIFIES

Electricity strengthens around REV. Pulses move from the understanding meter through REV toward the developing invention.

3 FORM DEVELOPS

A truthful outline appears, then supported components and relationships illuminate progressively. The developing form may rotate slowly.

4 REV CHECKS FIDELITY

REV compares the candidate with the captured description, must-haves, must-avoids, and authorised supporting evidence.

5 PROJECT IS SECURED

The exact Concept, geometry, evidence and Project state are persisted. Workshop restoration must not regenerate a different model.

6 WORKSHOP UNLOCKS

Only after stored 3D is ready does REV announce: YOUR FIRST 3D CONCEPT IS READY - Enter the Workshop.

TRUTHFUL ACTIVITY MESSAGES

Preparing the invention's form | Building key relationships | Creating Concept 01 | Checking it against your description | Preparing your Workshop

Animations may remain active while a real stage is pending, but they must never claim completion early. Reduced-motion users receive a calm alternative.

4. WORKSHOP ARRIVAL

REV presents the exact persisted 3D model created on Home with both hands extended.

- The approved Workshop architecture remains the destination. On first entry, Concept 01 occupies the centre podium.
- REV asks: Is this the invention you meant?
- YES - THAT'S MY IDEA accepts the initial form and recommends Engineering.
- NOT QUITE - HELP REV CORRECT IT routes the same Project to the Inventor's Bench for the smallest missing or incorrect detail.
- No generic substitute, no flat image pretending to be 3D, and no second regeneration during navigation.

APPROVED ARCHITECTURAL LOCK

This handover preserves the decisions required for implementation planning.

CANONICAL JOURNEY

Describe idea > ASK REV > Understanding grows

> REV Creation Theatre > Stored 3D > Enter Workshop

Locked principles

- No drawing is required; REV can learn through a string of basic questions.
- One useful question at a time. Never repeat information already captured.
- The understanding meter grows only when information coverage genuinely increases.
- Long creation waits must feel electrically active while remaining truthful.
- Workshop entry requires the first supported 3D Concept to be safely stored.
- The same model appears on the podium without regeneration.

IMPLEMENTATION STATUS

Approved visual and interaction architecture. This file authorises planning and construction against the stated journey; it does not itself prove that source-aware 3D generation is implemented.
